Thomas Jefferson National Accelerator Facility Site Orientation February 23, 2005

Mary Rawlins

U. S. Department of Energy - Oak Ridge Office

Background

- Thomas Jefferson National Accelerator Facility (TJNAF) is a DOE Office of Science (SC) dedicated-program laboratory. The Laboratory, originally the Continuous Electron Beam Accelerator Facility (CEBAF), was constructed beginning in 1987.
- January 9, 2004: DOE Secretary Abraham announced his decision to use competitive procedures to compete for the award of a new contract to manage and operate the TJNAF.
- October 2004: a source selection official (SSO) and source evaluation board (SEB) were designated to develop a Request for Proposals (RFP) in order to evaluate proposals for award of a new performance-based contract later this year.
- A draft RFP has been prepared and is currently undergoing internal review.

Purpose of Site Orientation

- To provide potential offerors:
 - A tour of the TJNAF site and facilities
 - A summary of programs and operations
 - The opportunity to submit questions; questions may be:
 - Technical
 - Programmatic
 - Site specific
 - Site history
 - An opportunity to ask questions relative to the RFP will be provided once the RFP is issued in both draft and final form.

Information/Announcements

- Packet of information is being provided that includes:
 - Agenda
 - Visitor Radiological Safety Guide
 - Presentation slides
 - Tour map
- Safety Announcements:
 - All participants must read the Visitor Radiological Safety Guide prior to tour
 - Hard hats will be required and provided in some areas

Ground Rules

- Attendees will be divided into four groups for today's tour.
- Groups will be assigned DOE escorts for the day you must be with your group and assigned escort at all times during the tour.
- Questions will be submitted and answered only in writing. Submit questions on numbered cards provided. No questions will be answered during the tour.
- Answers will be provided on the Oak Ridge Office/TJNAF SEB web site.
